Subject: Supplement to the Draft EIS for disposal of waste at Yucca Mountain

1 [Among the purposes of the EIS for Yucca Mountain is to provide the public with sufficient information to be able to judge the environmental effects of storing radioactive waste in the mountain under just about any contingency. Therefore, it is important for public acceptance of the waste site that the ability to REMOVE fuel from its placement in the site for any reason, and the impact of having to do so, either pre- or post-closure, be thoroughly evaluated.]
